Profile

iOS developer at the Apple Developer Academy for two years, with 4 apps published in the App Store and 1 Swift Student Challenge award from Apple. Also, studying and developing software since 2019 and currently studying Computer Science at PUCPR.

Work Experience

Apple Developer Academy

February/2023 – December/2024

Scholarship holder | iOS Developer

- Developed 8+ apps, working as an iOS Developer by myself or in multidisciplinary teams of developers and designers.
- I took part in all the stages of creating an app, from ideation and screen prototyping to programming in Swift and testing with the end user.
- Worked with the most diverse Apple frameworks, from those dedicated to interface creation such as SwiftUI and UIKit to more specific ones such as MapKit and SpriteKit.
- I practiced soft skills such as teamwork, effective communication and problem-solving. I also prepared informative and engaging presentations conducted entirely in English for the Apple team.
- I was part of the ambassador team, where I represented the Apple Developer Academy in Curitiba and exchanged experiences with representatives from other Academies in Brazil and around the world.
